

More blooms, more sales.

Crop quality protection from grower to retailer.

Chrysal Alesco[®] protects ethylene sensitive crops during shipping and at retail. The product is applied as a foliar spray 1–2 days before shipping to protect plants from postharvest damage caused by external sources of ethylene and transport stress. Alesco[®] improves plant quality resulting in greater sell-through and less shrink at retail.

Cost

- One 200 ml bottle of Alesco[®] treats approximately 1 acre.
- One 200 ml bottle of Alesco[®] costs less than 1 cent per pot!

Benefits

- Reduces petal shatter, bud abortion, leaf yellowing, and extends flower longevity.
- Increases retail shelf life up to 3 weeks depending on variety and environmental conditions.
- Can be used to hold flowers on crops when shipping is delayed.
