

Seed Geranium

Syngenta Flowers pioneered breeding of F1 hybrid seed geraniums more than 50 years ago. Today, we're proud to build on that history as the primary supplier of innovative new seed geranium genetics to the global market. Large or small plants, traditional or novelty flowers, Syngenta Flowers has a seed geranium for just about any application. The market leading Pinto™ Premium geranium series has been a staple for professional growers and retailers due to its ease of growing and fantastic performance in garden settings. And, now, with the acquisition of Floranova in 2019, we offer an even broader range of varieties with novelty and landscape vigor that will 'wow' the next generation of gardeners!
